Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11/18/05.

DETAILED ACTION

Response to Arguments

Applicant's arguments filed 11/18/05 have been fully considered but they are not persuasive. Applicants' argue essentially that the electrode, i.e. tissue stimulating surface, in the Salo reference is free of insulation and does not have a coating or sleeve as claimed. The Examiner disagrees. The claims are broader in scope than to include insulation over the entire active surface. The claims call for, e.g. Claim 1, "a majority of an exposed surface" to have the coating. The reading of Salo to have a majority, i.e. the proximal end of the electrode (helix), covered with insulation, is certainly within the scope of the claims as written. It would appear that the arguments suggest that the existence of insulation on the helical surface would make the electrode inactive, however, the electrode remains active but only unexposed over a portion of its length. Further, Applicant's argument that exposed surface, or active portion, is not covered in the cited references appears contradictory to the claims since only a majority of the claimed surface is coated in the claim. If the entire "exposed surface" were coated, it could not be considered as "exposed".

Claim Rejections - 35 USC § 103

Claims 1, 3, 6, 8, 11-14, 16, 19, 21, 24, 25, 27, 30, 31 and 33 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Salo et al., US 5,728,140, in view of Helland et al, US-5,545,210 for the reasons of record.

Claims 2, 4, 7, 9, 15, 17, 20, 22, 26, 28, 32 and 34 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Salo et al., US 5,728,140, in view of Helland et al, US-5,545,210 and further in view of Carson, US 5,931,862 for the reasons of record.

Claims 5, 10, 18, 23, 29 and 35 are rejected as being unpatentable over Salo et al., US 5,728,140, in view of Helland et al, US-5,545,210 and further in view of Stokes et al. H356 for the reasons of record.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
